

1 Before starting the bath, put on your assigned DoggieDay rubber apron and nylon sleeves to ensure you'll stay dry.

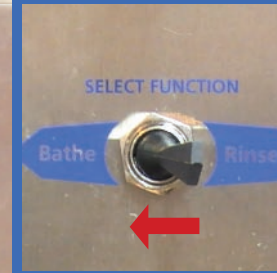

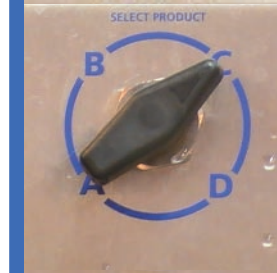

2 Brush out your pet's coat prior to getting into the tub (especially for long-haired pets).

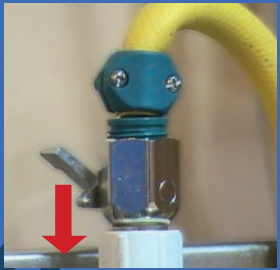

3 Place your pet into the tub (assistance available if needed), place the loop restraint around your pet's neck and slide the rubber clamp toward your pet's neck until snug.

4 Turn the water on at the handle and adjust the temperature with the hot (red) or cold (blue) handles - we recommend cool to warm heat. Wet your pet's entire body.

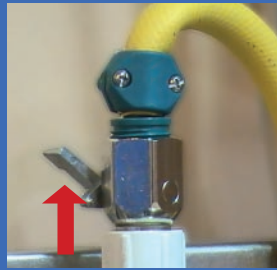

5 While your pet is still wet, select your shampoo from our various options. Once satisfied switch the tiny lever on the hydrosurge machine to bathe, this will initiate the flow of shampoo into the water. Completely wet your pet with the shampoo/water mixture.

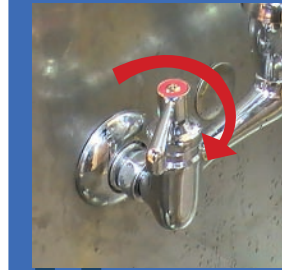

6 Turn the hydrosurge machine off with a turn of the metal lever on top of the machine

7 Massage the shampoo into your pet's coat with your hands.

8 Set the hydrosurge machine back to rinse from bathe and flip up the metal level at the top of the machine to initiate the flow of just water. Completely rinse off the shampoo from your pet's coat.

9 Turn the water off by the faucet handle.

10 Using your hands like a squeegee, start removing the majority of water from the neck down. Then towel dry your pet

11 Lift your pet out of the tub (assistance available if needed), and place onto assigned table. Secure the loop around your dogs neck and adjust table height appropriately by using the pedals on the floor.

WARNING: NEVER LEAVE YOUR PET UNATTENDED ON TABLE CAN CAUSE SEVERE INJURY OR DEATH.

12 Force Drying Option: The force dryer is located under the table, cool air will help remove the moisture from your pet's skin, blow out the under-coat and remove the coat your pet is shedding naturally.

13 After drying, give your pet a final brush out and return DoggieDay items to the front desk.
